One Day Guest Lecture on "Science and Technology for Sustainable Future : A landscape of Innovations for a Better Tomorrow"

1. Objective of the Event:

The objective of this guest lecture on "Science and Technology for Sustainable Future" would be to educate and inspire the students about the role that science and technology can play in creating a sustainable future. The lecture covered a variety of topics related to sustainability, including renewable energy, sustainable agriculture, waste management, and climate change. The guest speaker could discuss the latest scientific and technological advancements in these areas and how they can be applied to promote sustainability. They could also address the challenges and barriers to implementing sustainable practices and solutions and highlight examples of successful sustainable initiatives in various industries. The lecture could also touch on the importance of interdisciplinary collaboration between scientists, engineers, policymakers, and other stakeholders in creating a sustainable future. The students could be encouraged to engage in sustainability efforts in their personal and professional lives and to support policies and initiatives that promote sustainability.

Overall, the objective of the guest lecture would be to raise awareness about the importance of science and technology in creating a sustainable future and to inspire individuals to take action towards a more sustainable world.
