

## Policy for Green Campus

### Objective

- To achieve sustainability through energy conservation.
- To reduce carbon foot print.
- To manage solid waste effectively.

### Scope

The policy on Green Campus of the Institute calls for need to address issues related to Energy conservation, Waste management and landscaping. Water conservation is achieved through rain water harvesting and recycling of waste water. Electrical energy is conserved by using solar power instead of conventional sources of energy. Reducing carbon foot print by encouraging utilization of bicycles and battery powered vehicles. Solid waste collected in the campus from various sources is managed effectively.

### Implementation

To achieve the above objectives, the institute proposes the following initiatives

- To encourage staff and students to use bicycles and battery powered vehicles in order to reduce carbon foot print.
- To install solar panels on the roof tops and wheeled to the grid.
- To sensitize staff and students on the importance of power saving.
- To construct recharge pits for harvesting rain water.
- To reuse waste water for gardening.
- To restrict various stakeholders and vendors in the campus on usage of single-use plastics.
- To organize Energy, Environment and Green audits to review the effective usage of resources.
- To make aware of natural resource conservation and pollution free environment through extension activities.

**CIRCULAR**

It is here by informed that the time has come for a systematic campaign to reduce the usage of plastics. The Government has decided to take plastic ban as a national level campaign to address the environmental hazards. This brings attitudinal changes that avoid use of plastics. You are also advised to educate the students and households on the need for avoiding usage of plastic.
