<b>15. Multidisciplinary / interdisciplinary</b>	
MULTIDISCIPLINARY / INTERDISCIPLINARY	

KKR & KSR Institute of Technology and Sciences is committed to producing industry-ready, value-added bright engineering graduates through the enhanced curriculum. Therefore, the curriculum is designed based on the Andhra Pradesh State Council of Higher Education's revised engineering curriculum-2020 guidelines. The curriculum feature is that the courses must cover depth (Specialization) and breadth (Multidisciplinary/ Interdisciplinary) to attain program outcomes.

The curriculum also gives the Institution flexibility in offering a variety of professional elective courses to have multidisciplinary knowledge by combining several professional specializations. Whereas the curriculum provisioned a pool of interdisciplinary open elective courses into the curriculum of each branch of engineering, from which a student can pick his choice. Flexibility in academics is given to choose the courses offered by any other reputed organization/professional body with certification.

Another highlight in the curriculum is the introduction of B.Tech. with Honors or a Minor. It allows fast learners to earn additional credits either in the same domain or in a related domain, making them more proficient in their chosen field of discipline or graduate with multidisciplinary/ interdisciplinary knowledge and job-ready skills.

#### **16. Academic bank of credits (ABC):**

Yes

#### **17. Skill development:**

From the several studies made across the globe reveals that the engineering graduates must acquire additional technical skill other than curriculum for industry readiness. To meet the challenge, demands of the dynamic industry that increasingly requires technocrats to be innovative, flexible, and adaptive. Therefore, the skill development of undergraduate students is facilitated through two aspects. One is skill-oriented course embedded in the curriculum whereas another is value added skill training program in the emerging technocrats. In this connection, five skill-oriented courses are facilitated in this curriculum over the Programme from the 3rd semester onwards. Out of the five skill courses, two shall be skill-oriented courses from the same domain and completed in the second year. Of the remaining three skill courses, one shall necessarily be a soft skill course. The remaining two shall be skill-advanced courses either from the

same domain or Job oriented skill courses, which can be interdisciplinary. The board of studies concern will review and update skill-oriented, skill advanced courses, and value-added skill training program every year based on industrial demand and recommend a standard external agency to facilitate these courses.

#### **18.Appropriate integration of Indian Knowledge system (teaching in Indian Language, culture, using online course)**

Aiming at the Conceptual Modification of Education System of India on the framework of Indian Knowledge System, the course is introduced to the 2 year Engineering Students of all branches. The course promotes trans disciplinary research on all aspects of Indian Knowledge System.

The course covers Indigenous and traditional ways of learning about Mathematics, Astronomy, Philosophy and yoga. The course helps students to be aware of the form of arts; works of literature; customs; traditions; linguistic expressions, artefacts, culture and heritage sites etc;

The curriculum is framed on introduction of Indian classics, teaching and learning various Indian Languages to empower the language abilities among the students, the current issues and concepts are widely discussed in languages. In this way, the students are able to converse extensively in relevant languages. Teaching in Indian languages, especially, in mother tongues, ensures the child faster learning and retention. The activities that are introduced in the course will certainly help students to practice the language contextually and meaning fully. Culture, especially reinforces our Indian knowledge among the students strongly. It will promptly and inherently hints them to follow and transfer it to the next generations that keep on following it without any deterioration.

#### **19.Focus on Outcome based education (OBE):Focus on Outcome based education (OBE):**

##### **FOCUS ON OUTCOME-BASED EDUCATION**

Outcome-based education (OBE) is an educational pedagogical system that bases each part of an educational system around goals. By the end of the educational experience, each student should have achieved the goal. According to Ron Brandt, the OBE is based on four concepts. Clarity of focus on curriculum design, instructional delivery, and assessment is in line with the expected outcome, expanded opportunity providing ways and number of chances to learn and demonstrate, High expectations, Design

the curriculum from the perspective of expected outcome

In an international effort to accept OBE, the Washington Accord was created in 1989. The member countries recognize the offered programs through their accredited board. The OBE system is embedded with the following vital terminologies. Course Outcomes (COs) are statements indicating the knowledge and skills the student is expected to acquire at the end of a course. Program outcomes (POs) are based on the Graduate's Attributes representing the knowledge, skills, and attitudes the students should have at the end of the program. By the end of the program, POs attainment can be quantified through CO's attainment of various courses of that program. The key managers of OBE implantation are the Programme Coordinator, Module Coordinator, and Course Coordinators.

## 20.Distance education/online education:

In our institution there is no provision for Distance Education. But we encourages online education via various online programs like webinars, guest lectures , technical talks , internships ...etc

#### CURRICULAR ASPECTS

##### 1.1 - Curriculum Design and Development

1.1.1 - Curricula developed and implemented have relevance to the local, national, regional and global developmental needs which are reflected in Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) of the various Programmes offered by the Institution.

We adopt the curriculum overview provided by the Jawaharlal Nehru Technological University, Kakinada. Depending on our resource potentiality, institutional goals and concern towards the students, we impart quality education. The institution has developed a structured and effective implementation of the curriculum to meet Program Outcomes specified by NBA/NAAC and the Course Outcomes defined/framed by the respective course

experts. Following are the various means through which it executes the curriculum. HOD's Meeting: HOD's Meetings are held once in Month. Head of the Department discusses their action plans to arrive at an optimal and effective way. Academic Calendar: Academic Calendar is prepared as per the JNTUKacademic schedule and the requirements at the department level as per the action plans formed. Lesson Plan: A Lesson plan includes content topics, content beyond the syllabus topics, tutorial topics, text books and reference books prepared by respective faculty members at the beginning of each semester. It gives an insight how the lecture class will be handled throughout the semester. Meeting the Vision and Mission of the Concerned Department: Each department sets their own Vision and Mission which match with the Institutional Vision and Mission. Program Educational Objectives (PEO) and Program Outcomes (PO) are developed for each program and Course Objectives (CO) and course outcomes are defined for each theory course and laboratory.

## 2.2 - Catering to Student Diversity

2.2.1 - The institution assesses students' learning levels and organises special programmes for both slow and advanced learners.

The advanced learners are identified based on their overall academic performance and their orientation towards Academics. We always had the culture of encouraging advanced learners by providing them necessary guidance and moral support. Advanced learners are encouraging by giving appreciations certificate and cash prize. Encouraging the advanced learners to attend conferences, workshops, various competitions organized by the different national and international institutions. As results of these practice many of our students published papers in journals, conference proceedings and some of our students got prizes in national level Innovative projects computations.

The department has a well-defined process of monitoring, guiding and assisting slow learners (weak students). Care is taken by the faculties in monitoring the performance of slow learners, the students deviations from studies is observed by the respective section coordinators and corrective measures are suggested. A blended motivation and responsibility from both parents and faculty will create a positive mindset and will help to overcome the inabilities and hurdles faced by the slow learners. A special counseling and tutorial classes are conducted to the slow learners. As a result of this process, we observed good improvement in the learning levels in the slow learners.

### 2.3 - Teaching- Learning Process

2.3.1 - Student-centric methods such as experiential learning, participative learning and problem-solving methodologies are used for enhancing learning experiences:

We adapted the following student centric learning methods to provide the better learning experience to the student.

**Real life examples:** for each course, faculty explains the concept with appropriate real life examples, for example data communication course telephone, cellular, internet communication is the real life examples.

**Analogy:** faculty explains the many concepts through analogy ( learning the new things through comparison with already know things), for example in data structure operation of the queues, stack can explain with known experience.

**Collaborative learning:** faculty encourages the collaborative learning through conducting seminars, group discussions, projects, and quiz

**Role Play:** some of the faculty members initiated role play to demonstrate the concepts, for example in data structures sorting and searching methods are demonstrated.

**Experiential Learning** is the process of learning by doing. By engaging students in hands-on experiences and reflection, they are better able to connect theories and knowledge learned in the

classroom to real-world situations.

A Flipped classroom is an instructional strategy and a type of blended learning, which aims to increase student engagement and learning by having pupils complete readings at home and work on live problem-solving during class time.

As results of the above specified student centric teaching learning methodology usage in the teaching brought a lot of improvement in the teaching learning process.

2.3.2 - Teachers use ICT-enabled tools including online resources for effective teaching and learning

Continuously adopts various ICT tools with innovative Teaching & Learning methodologies to create the best learning environment for students. As part of this, we have digital resource in the library server, which can be accessible from anywhere for both the students and faculty. Apart from this digital repository, we have a learning management system with the name "BEES ERP". It provides digital platform to conduct the online class in audio visual mode, resource sharing, recording session, live sessions, assignments, assessment in both descriptive and multiple choice format. BEES ERP also provides the student performance tracking, attendance tracking, result analysis and counseling details for better monitoring and coordination of the academic activities. Our institute is having MOU with different digital learning platforms like 'Great learning', 'IIT Gouhathi', 'NIT Warangal', 'ICT Academy', 'IIT Bombay', 'Coursera', 'NTPL' etc.

2.5.3 - IT integration and reforms in the examination procedures and processes including Continuous Internal Assessment (CIA) have brought in considerable improvement in the Examination Management System (EMS) of the Institution

Examination Management System (EMS) services are available to integrate all the activities in the examination branch. The pre and post examination activities are integrated, starting with examination notification, generation of time tables, list of eligible students to generate hall tickets based on the attendance and generation of data base for the preprinted OMR answer booklets, seating arrangements in the examination halls, invigilation duties, D-forms during examinations are generated

with it. The internal continuous assessment marks are also uploaded in the data base of EMS and will be integrated with end semester marks at the time of results processing.

The Institute is using the OMR technology for the printing of preprinted bar coded answer booklets thereby avoiding manual coding of answer booklets , scanning the marks slips and processing the results and printing the reports and certificates. The EMS is enabling the student to download the hall tickets and results online. Complete automation of examination process helps in the successful execution of examination processes such as monitoring of examination fee payment, examination schedule, seating arrangement, attendance monitoring, coding and decoding of scripts, marks data entry, preparation of programme wise results.

## 2.6 - Student Performance and Learning Outcomes

2.6.1 - Programme Outcomes and Course Outcomes for all Programmes offered by the institution are stated and displayed on the website and communicated to teachers and students

Our institution has a practice of preparing the course outcomes for all the programmes offered by the institution through the concern subject faculty at the beginning the every semester. Once it was ready, we keep it in the college website and distributes course outcome details to all the staff member, students, alumina, parent, academicians and industry people though our website. We collect the feedback and suggestions on the course outcome from the different stockholders. Based on the analysis of the collected feedback, we would like to refine the course outcome in the upcoming course duration.

## 2.6.2 - Attainment of Programme Outcomes and Course Outcomes as evaluated by the institution

Assessment provides important feedback to both instructors and students. The techniques of outcomes assessment as a means of measuring student learning and the use of that information to improve teaching are considered first. We follow the following assessment processor

### Benchmark

1. Theory courses - the benchmark will be 50%
2. Laboratory course - the benchmark will be 80%
3. Project courses - the benchmark will be 90%

### CO-PO-PSO mapping

Assessment gives us essential information about what our students are learning and about the extent to which we are meeting our teaching goals. The following four tools are used to assess the Course outcomes

1. Internal Tests
2. Online Quiz & Assignments
3. University Results
4. Course Outcome Feedback

The process of attainment of POs starts from writing appropriate COs for each course of the program. The course outcomes are written by the respective faculty member using action verbs of learning levels. Then, a correlation is established between COs

and POs in the scale of 1 to 3, 1 being the slight, 2 being moderate and 3 being substantial. A mapping matrix is prepared in this regard for every course in the program

7.1.3 - Describe the facilities in the institution for the management of the following types of degradable and non-degradable waste (within a maximum of 200 words)

Our Institution has taken many initiatives towards waste management. The Institute follows the principle of 3R (Reduce, Reuse and Recycle) to meet its objective of Sustainable Development by bringing ecological balance.

The vegetable waste from the canteen are arranged to be disposed regularly to keep the campus clean. Being an educational institution, the college does not generate any hazardous waste. The institution's key operation has very less impact on the environment as the college is very conscious of generating less waste. However, waste is generated by all sorts of routine activities carried out in the College that includes Paper, plastics, glass, metals, foods, etc. The college believes its utmost responsibility to remove all waste not only for the safety of the students but also for the harm it causes to the environment.

Adequate number of trash cans and dust bins are placed all over the campus. The collected waste is disposed with the help of Guntur Municipal Corporation (GMC) on a daily basis. The institute promotes minimal plastic usage; it also encourages staff and students to reduce the usage of paper. Sanitary Incinerators are installed inside the campus to promote hygiene. Various awareness campaigns are organized on waste management .To sustain eco-friendly and green enabled campus, various NSS programs like Swach Bharat, Clean & Green activities and plantation in campus are regularly conducted.
