Filing Date	:NA	

(57) Abstract :

Abstract This invention the Chilly is considered as one of the commercial spice crops. It is the most widely used universal spice, named as wonder spice. Different varieties are cultivated for various uses like vegetable, pickles, spice and condiments. In daily life, chillies are the most important ingredient in many different cuisines around the world as it adds pungency, taste, flavor and color to the dishes. The Indian chilly is considered to be world famous for two important commercial qualities namely, its color and pungency levels. Some varieties are famous for the red color because of the pigment and other quality parameters in chilly are length, width and skin thickness. The world production of chilly crop to around 7 million tones, which is cultivated on 1.5 million hectares of land. India is the world leader in chilly production. Among Indian states, Andhra Pradesh is one of highest chilly producing state. Andhra Pradesh is having highest area, output and productivity of chilly. So there is a lot of scope to increase the chilly area. Hence our parents as well as other neighbors, relativesTM main occupation are chilly cultivation
