Hackathon on Artificial Intelligence from 6th January to 8th January, 2022 at KKR & KSR Institute of Technology and Sciences, Vinjanampadu, Guntur by MadBlocks Academy

1. Objective of the Event:

The purpose of a hackathon is to tackle a specific problem during a period of time. Typically, a hackathon addresses numerous concerns, each of which is addressed in its own track. The Department of Information Technology, KKR & KSR Institute of Technology and Sciences is hosting a three-day workshop on Artificial Hackathon to acquire innovative skills. An Hackathon is a design sprint-style event in which computer programmers and others involved in software development, such as graphic designers, interface designers, project managers, and others, frequently including domain experts, work together on projects intensively. Typically, hackathons begin with one or more talks about the event as well as the topic at hand. Then, based on their particular interests and skills, people propose ideas and establish teams. The hackathon's primary work begins after that, which can take up to 36 hours.

The major goal of the hackathon is for participants' minds to build innovative talents. Hackathons and other intense problem-solving situations make it easier to come up with new ideas and concepts. The basic goal of a hackathon is to identify a problem and work together to develop technologies to tackle that problem. The Hackathon gives participants the opportunity to learn something new.
