

7.1.3 - Management of Degradable and Non Degradable Waste Geotagged Photographs

Our Institution has taken many initiatives towards waste management. The Institute follows the principle of 3R (Reduce, Reuse and Recycle) to meet its objective of Sustainable Development by bringing ecological balance. The vegetable waste from the canteen are arranged to be disposed regularly to keep the campus clean. Being an educational institution, the college does not generate any hazardous waste. The institution's key operation has very less impact on the environment as the college is very conscious of generating less waste. However, waste is generated by all sorts of routine activities carried out in the College that includes Paper, plastics, glass, metals, foods, etc. The college believes its utmost responsibility to remove all waste not only for the safety of the students but also for the harm it causes to the environment. Adequate number of trash cans and dust bins are placed all over the campus. The collected waste is disposed with the help of Vinjanampadu Panchayathi on a weekly basis. The institute promotes minimal plastic usage; it also encourages staff and students to reduce the usage of paper. Sanitary Incinerators are installed inside the campus to promote hygiene. Various awareness campaigns are organized on waste management. To sustain eco-friendly and green enabled campus, various NSS programs like Swachh Bh arat, Clean & Green activities and plantation in campus are regularly conducted.
