Department of CSE, KITS,
organized “6-Days SOC on Android App Development” from 16-10-2023 to 21.10.2023

Description:

Android software development is the process by which applications are created for devices running the Android operating system. Google states that "Android apps can be written using Kotlin, Java, and C++ languages" using the Android software development kit (SDK), while using other languages is also possible. The Android platform offers a wide variety of APIs that can help students tap into the cloud and overcome the limitations of mobile devices, which generally have less memory and processing power than other platforms.
