About Workshop:

The objective of the workshop is to enhance the knowledge and skills of the participants on IOT covering the entire spectrum of IOT technology including End to End IoT Architecture, Hardware and Software Platforms for building IOT Solutions and much more. Since IOT involves a unique combination of multiple technologies dovetailing seamlessly, it is critical to understand the interactions and combination of Hardware and Software technologies to get a complete perspective.

Students will be given the opportunity to apply these technologies to tackle scenarios of their choice in teams of two or three, using an experimental platform for implementing prototypes and testing them as running applications. The enrolling candidates for the workshop should have pre-requisite skills of C Programming and basic electronics concepts.
